

Notice: Department of Transportation (DOT) Custody and Control Form (CCF) changes

Dear Valued Client, please review this important information regarding changes to 49CFR Part 40 and implementation date for revisions to HHS and DOT workplace drug testing programs.

The DOT had published its final rule regarding the Procedures for Transportation Workplace Drug and Alcohol Testing Programs (49 CFR Part 40). The Effective date for both the HHS and DOT guidelines is **October 1, 2010**. The full document can be viewed on the DOT website www.dot.gov/ost/dapc and includes important updates to additional drugs tested and lower cutoff levels.

As of September 3, 2010 OMB approved the revised federal CCF and will be distributed once PAML's supply of old forms has been exhausted in the coming months to conserve resources and keep costs to a minimum.

****The current CCF forms in circulation can still be used at this time****

Please visit www.paml.com for additional update as information becomes available or contact us at 800-541-7891 x7.
